

Protect Patients' Rights If Immigration Enforcement Shows Up at Your Hospital:

- Immediately notify administrators & legal counsel
- DO NOT allow officers into non-public areas
- DO NOT violate HIPAA or disclose any patient info, including location
- Keep patient records out of view (e.g. close electronic records, hide info on boards, etc.)
- DOCUMENT enforcement activities in detail (date/time/names/actions)
- DO NOT video record; instead AUDIO record to document you are following policy

Repeat Out Loud During an Immigration Enforcement Action at Your Hospital:

“I do not give immigration officers permission to enter non-public areas without a signed judicial warrant.

Immigration officers must speak with our designated administrator.”
